

## Abstract of the disclosure

## Herbicide/safener compositions

There are described herbicidal compositions which comprise at least one herbicidally active compound of the formula (I) and at least one crop-plant-protecting compound as safener.

In this formula (I), V is an optionally substituted radical selected from the group consisting of isoxazol-4-yl, pyrazol-4-yl, cyclohexane-1,3-dione-2-yl and 3-oxopropionitril-2-yl and  $R^9$  is nitro, amino, halogen or a carbon-containing radical. The group of the safeners contains, for example, 2,4-D, cyometrinil, dicamba, dymron, fencloirim, flurazole, fluxofenim, lactidichlor, MCPA, mecoprop, MG-191, oxabetrinil, methyl diphenylmethoxyacetate, 1-[4-(N-2-methoxybenzoylsulfamoyl)phenyl]-3-methylurea, 1,8-naphthalaic anhydride, 1-[4-(N-2-methoxybenzoylsulfamoyl)phenyl]-3,3-dimethylurea, 1-[4-(N-4,5-dimethylbenzoylsulfamoyl)phenyl]-3-methylurea, 1-[4-(N-naphthoylsulfamoyl)phenyl]-3,3-dimethylurea, (4-chlorophenoxy)acetic acid, 4-(2,4-dichlorophenoxy)butyric acid, 4-(4-chloro-o-tolyloxy)butyric acid, 4-(4-chlorophenoxy)butyric acid, in each case their acids and esters, N-acylsulfonamides, N-acylsulfamoyl-benzamides, in each case, if appropriate, also in salt form and in each case optionally substituted 1-phenylpyrazoline, 1-phenylpyrazole, 1-phenyltriazole, 5-phenylisoxazoline and 5-phenylmethylisoxazoline-3-carboxylic esters and 2-(8-quinolinyloxy)acetic acid derivatives.
